## 1 Welcome

Please note that this document has no regularity power and are only to be considered as information. This document, Rally Guide 1, is mainly produced for the teams, competitors and media and contains information necessary for the preparation before the event. Further information will be given in the supplementary regulations, and later in the Rally Guide 2.

### 1.1 East Sweden Rally

East Sweden Rally is the final round of the Swedish Rally Championship 2018. The rally will take place 7-8 September in the region of Östergötland with Linköping as HQ. The HQ as well the service park is located at Saab Arena.

The rally has a total length of approximately 390 km with 10 stages over 106 km, with one super special stage, on tarmac, driven two times. The rally will be divided into three legs, one on Friday and two on Saturday. It will be possible to restart both after leg one and leg two. All stages are gravel except the super special stage: 99 % gravel, 1 % tarmac

Östgöta classes will run the stages on Saturday, SS4-SS10 and has a total length of approximately 270 km with 7 stages over 81 km.

## 5 Service parc

### 5.1 Service parc

The main service parc for the entire rally will be located at HQ Saab Arena in Linköping and will be open from 07.00 Friday morning, September 7<sup>th</sup>. If requested to park already on Thursday, contact Service Area Manager.

We have a limited area for service. For that reason, we have to thoroughly plan the service parc. Each team will receive a fixed location on the service area fitted for a service vehicle of VW Crafter model (7 m. long) and a mobile tent with a size of 3x6 m. There will be no place for caravans / motorhomes at the Service Park. There is a possibility to get bigger service area, but the charge will be 50 sek/sqm and has to be booked in advance.

**Following must be reported to Service Area Manager before Monday August 27<sup>th</sup> 18.00:**

- If you need bigger area than above mentioned service vehicle and tent combination.
- If you want to stand beside a certain competitor.
- If you have a marquee or a tent that are mounted on your service vehicle.

For ordering a larger service area or requesting a special placement, please contact Service Area Manager at the *latest* Monday 27<sup>th</sup> August 2018 18:00.

#### **Service Area Manager**

Name Reine Lundqvist  
Phone +46-702 071181  
E-mail reine.lundqvist@eastswedenrally.se

Unloading of race car and parking of trailer are done at designated area before you enter the service park. One (1) service vehicle is allowed on the service park if nothing else has been agreed with service park manager. Each team has one (1) parking space for a car (eg Recce car) close to the service park. Other vehicles have to be parked at designated parking areas according to state and local law.

There will be no space or time to make any changes during the race. When you arrive to service park you will be shown to your service area by an officer.

#### **5.2 Dressing rooms**

Dressing rooms and showers are available at the Saab Arena, information is available at the infodesk.

#### **5.3 Food service**

During entire East Sweden Rally we will have a kiosk/grill located outside Saab Arena. It will be open both Friday and Saturday, for more information see [www.eastswedenrally.se](http://www.eastswedenrally.se)

## Appendix 4 – Environmental policy

# Environmental policy

East Sweden Rally operation should be characterized by environmental considerations and striving for a long-term sustainable society. We want the entire organization to be engaged in environmental work and that each marshal takes environmental considerations into the decisions taken.

East Sweden Rally comes through a conscious to work for the environmental impact to be reduced and we will:

- Commit to continuously improve our environmental work
- Define clear goals and frameworks for our environmental work
- Educate and inform as many people as possible both within the organization and externally of our environmental policy
- Comply with relevant environmental laws and regulations, and other environmental requirements
- Follow Swedish Automobile Sports Federation environmental policy
- Have a purchasing policy stating that you actively choose eco-labeled and set environmental requirements for partners and suppliers
- Seeking to limit our environmental impact as much as possible
- Handle environmentally correct with all materials such as fuels, oils and other liquids, as well as batteries and end-of-life car parts
- Active work to prevent environmental accidents
- To inform and follow up that competitors and officers follow the environmental plan for East Sweden Rally

## Appendix 5 – Safety tracking system

### GPS for security and monitoring

Safety tracking system will be used during ESR for all competitors including for Östgötaclasses.

Tracking of team will be applied incl. speed control during the reconnaissance according to Swedish Championship regulation, Rally SM 2018, which means we will use Racetimings GPS / tracking equipment. The following equipment will be assembled to have the right connector installed in the race car when you get to the rally.

A GPS is distributed at the time of registration and will be used both during the reconnaissance and the race. During the reconnaissance, it will be monitored that the drive through of the SS will take place not more than 2 times and that the speed is maintained according to the supplementary regulations. Violations will be punished by supplementary regulations. During the competition, the system is used as a safety feature to monitor where the race car is located.

At reconnaissance, GPS must be switched on when the reconnaissance car is in motion as well as during the race on Friday from start ramp (TC0) to finish (TC 10A).

Everything will be returned when arriving parc fermé after finish (or return of log-book)

### Connectors and installation

In the reconnaissance car, the GPS is connected via the cigarette lighter socket, while in the race car the competitor must prepare a constant 12V connector.

In order for the system to function, constant current must be in the rally car (directly from the battery) Swedish regulations have been modified by this requirement.

Be sure to connect directly to +12 VDC with 5A fuse protection on cable. The length of the cabling must be such that the connector can be placed in the interior compartment, on or close to the rear strut tower or equivalent.

The ignition connection must also be connected to + 12 VDC or broken 12V by the main switch

Connectors must be as follows:

House:	1 st Tyco/AMP superseal 1,5 series 3p 282105-1
Crimping sleeves:	3 st TE/AMP 183025-1 (AWG 15-18) or 3 st TE/AMP 183035-1 (AWG 22-20)
Wire seal:	3 st TE/AMP 281934-2

Can be ordered from:

House	Elfa.se article no 144-02-704
	Conrad.se article no . 749802
	Electrokit.com article no. 41010816
	Biltema. art.nr 44155 (wire seal included)

Crimping sleeves (AWG 15-18)	Elfa.se article no 144-02-732
	Electrokit.com article no 41010823
	Biltema article no 44159

Crimping sleeves (AWG 22-20)	Elfa.se article no 144-02-734
	Conrad.se article no 749742

Wire seal; Elfa.se article no 144-02-740  
Conrad.se article no 749694  
Electrokit.com article no 41010826

The connector is connected as follows:

- Pin 1 12 V permanent (not broken by main switch)
- Pin 2 Ground
- Pin 3 Ignition or broken 12V by main switch

### Mounting

Rally car - mount the device on any rear tube of the roll cage with tape or equal, but not "silver tape", so the top of the unit "looks" up / out through the rear side window, not lower than the bottom of the window.

Secure the connection board with tape or equal, so do not loosen from the device

If an external GPS antenna is included, mount it on the roof, secure with a tape, and "pinch" the cable gently into the door / back cover and connect it to the connector on the device

Alternate mounting can be done on the hat rack or corresponding roll cage details so that the unit is cleared through the rear window, but not lower than the bottom of the window.
